

Water Heating Technology Roadmap Workshop

Federal Energy Management Program

Water Heating Information

Federal Technology Alerts –

Parabolic-Trough Solar Water Heating—A renewable technology for reducing water-heating costs (October 1998). It is available in portable document format ([PDF 1.2 MB 44 pages](#)).

Modulating/Condensing Fuel-Fired Water Heater and Hydronic Boiler—Technology for increasing water heater/hydronic boiler efficiency (June 1998). It is available in portable document format ([PDF 658 KB; 32 pages](#)).

Commercial Heat Pump Water Heaters—Technology for efficient electric service water heating in commercial buildings (September 1997). It is available in portable document format ([PDF 727 KB; 32 pages](#)).

Solar Water Heating—A well-proven technology pays off in several situations (May 1996). It is available in portable document format ([PDF 1.8 MB; 44 pages](#)).

Residential Heat Pump Water Heaters—Energy-saving alternative for home hot water (September 1995). It is available in portable document format ([PDF 3.6 MB; 34 pages](#)).
